1. The Gdansk Metal Products Works (Gdanskie Zaklady Wytobow Metalowych, Przemyslu Terenowego) consist of plants in the Gdansk (Danzig) area, two of which are located in Cisow and Oliwa.
2. Officially, the factories work as auxiliaries to the larger workshops in the Naval Shipyard, Gdynia and Gdansk Shipyards, etc. For example, the Gdansk Metal Products Works produce various kinds of cisterns, boilers, skeleton super-structures for larger fishing cutters for the Gdynia Repair Yard. Unofficially, gun shields are made for the army, this production being kept secret.

Comment: It is possible that this plant is identical to the Metal Products Factory located in Rumia Zagorze. This latter report stated that the workers of the Gdynia Repair Shipyard believed that the plant was engaged in military production since it took such a long time for civilian orders to be filled. Another source observed empty army trucks enter the area at night and leave heavily laden.

Legend:

1. Gdynia - Zagorze main road.
2. Dirt road leading from main road to private houses near the forest. A still worse road leads off this one to the gate of the plant.
3. Stream.
4. Cisow church.
5. Private houses.
6. Factory yard. The buildings are surrounded by a high wooden fence. A view of the plant can be conveniently obtained from the edge of the forest which is on a slope. A length of fencing, 10 to 15 meters, leads into the courtyard from the fence by the back gate. Its purpose is not known.
7. Raw materials' store. A rectangular building, length approximately 25 meters, on high brick foundations. Walls are wooden. It gives the impression of being an old building.
8. A 10 by 10 meters square building, height 6 to 7 meters. The assembly shop is located here.
9. Foundry and workshops.
